

Does anyone in your family suffer from asthma or allergies?

Are you constantly sanitizing every inch of your home?

Are you always trying to cover up lingering odors?

Are you concerned about mold and bacteria growth in your home?

What is hiding in your home?

Refresh Air Purification can solve these issues and more.
We bring the outdoor air inside.

How do we do it?

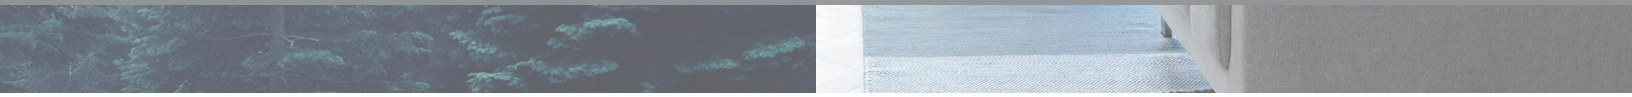

Outside, the sun reacts with minerals on the earth and the reaction creates a level of Hydrogen Peroxide, the same chemical found in the brown bottle at the pharmacy. This reaction is called Photo Hydro Ionization. Refresh Air uses a UV bulb to react to 5 minerals on our patented cells to create the same reaction. Your air handling system, collects this vapor H₂O₂ and sends it out into your home to create cleaner, fresher air that sanitizes, kills viruses, mold, mildew and eliminates odors in your home.

What else could you need?

Our Refresh Air Platinum has added an electronic ionizer. This ionizer sends out positive and negative ions that electronically charge dust and floating allergens in your home. The particulate is then attracted to other particles and the bigger heavier clumps of dust and allergens get big enough to drop to a surface or go into your HVAC systems return air system.
